

# MOBILEmap

## Respond from the road with Mobile Map!

“Mobile Map” is an emergency display software that can be easily installed on any mobile emergency vehicle’s computer or on your smart phone as an app (internet access not included) that will display call routes from GPS from your location to any incident location.

“Mobile Map” can also help you locate fire hydrants, hospitals, emergency centers, SARA facilities, and many other important locations that are critical in reducing your responding time to any emergency situation.

- Displays call route from GPS on a mobile computer to the incident location
- Displays custom information such as: fire hydrants, SARA facilities, etc.
- Displays call information, call updates and locations on map
- Integrates with GeoPlan and similar GIS software
- Real-Time incident tracking on map
- Real-Time call printing
